

PITTURA VIVA

Internal lime paint

.....

Ready to use lime paint, 100% natural, without grain for internal walls.

Properties

- 100% natural
- A wide range of 320 colours guarantees a precise colour (the mixtures can be prepared in advance for homogeneity on sites)
- Highly resistant to temperature changes and hygrometry
- Very good adhesion to substrates
- May form a protective wax
- May form a patina to obtain more colours
- Can be applied on many substrates (lime, cement with 60-70% lime content, gypsum or breathing paints). On non-porous substrates, apply PRIMER SAN TOMMASO before applying the paint

Packaging

800-ml pots, 4-L and 12-L buckets

Pigments

- SOCLI sparkling pigments
- SOCLI natural and synthetic pigments

Uses

Internal lime paints

Contraindications

- Do not work on a closed-off substrate
- Do not apply outside of 10°C to 30 °C

Consumption

10 to 12 m²/L and by layer (depending on the substrate)

Components

Lime putty, egg, calcium carbonate, albumine, talco, mica, methylcellulose, starch, boiled linseed oil (lead-free), desiccant cobalt-manganese base, traces of mineral oil, milk, essential oils
