

PRIMER ACCRO S

Primer for internal and external walls

.....
PRIMER ACCRO S is designed for the preparation of walls before application of a stone repair mortar, which requires a significant thickness.

Properties

- It gives a rough consistency to walls for better bonding
- It allows the bonding of renders on wood or on a painted façade
- Applied with a roller or a brush
- Cover it afterwards for 10 minutes to 24 hours (maximum)

Related products

- Natural limes

Uses

Prepare substrates before renders and especially on significant thicknesses

Contraindications

- Do not apply outside of 5°C to 30°C
- Use neat on non-porous substrates
- Dilute on porous substrates (1 L of PRIMER ACCRO S for 1 L of water)

Packaging

5-kg tin

Consumption

5 to 6 m²/L for the final mixture (neat or diluted) depending on the substrates
